

Pro Therm – With the warmest recommendations

Pro Therm is a reliable partner for electrical heat tracing systems. We are an innovative company with many years of experience and expertise in the field of electrical trace heating for pipelines, tanks and instruments.

Our range of services includes those favored in the market heat tracing systems:

- Self-limiting heating cables,
- Teflon-insulated heating cables,
- Mineral-insulated heating cable,
- Coldroom heating systems.

We offer turnkey plants, from engineering to commissioning, but also as supply of components. Furthermore, we have all accessories, control equipment, switchgear construction, installations and CAD/CAE documentation at our disposal, including the necessary EX certificates and qualified personnel.

On fire for innovative solutions

When it comes to the latest technologies and their application in heat-tracing systems, we are in our element. We assure you that we will always be able to present the best products and the most economical concepts. That is why we put our hand in the fire.

Here we are in our element

When it comes to implementation, our highly qualified operating and assembly personnel are deployed at home and abroad.

We offer you:

- Short delivery time
- Local assembly
- Permanently monitored production process
- Turnkey installations
- Reliable services
- SCC-certified staff.
