

Pro Therm – Always the right temperature

Pro Therm is a reliable partner for electrical heat tracing systems. We are an innovative company with many years of experience and expertise in the field of electrical trace heating for pipelines, vessels and instruments.

Our range of products and services includes the trace heating systems favoured on the market such as:

- Self-limiting heating cables,
- Single core teflon-insulated heating cables,
- Single core mineral-insulated heating cables,
- Foundation freeze protection systems for cold rooms.

We offer turnkey plants, from engineering to commissioning, but also as supply of components.

Furthermore, we have all accessories, control and regulating equipment, switchgear construction, installations and CAD/CAE documentation at our disposal, including the necessary EX certificates and qualified staff.

References – With the warmest recommendations

What more speaks for a company than its references? In the following we would like to show you some selected projects and partners, so that you can convince yourself of our efficiency in this way.

Electrical heat tracing	Electrical foundation freeze protection
Kraftwerk DOW Stade, Germany	Aldi/Hofer
Ferrybridge, England	Bofrost
