

Structure

Manufactured Heating Element

Features

- Resistant to aging and UV radiation
- Resistant to acids, alkalis, etc.
- Easy to install due to easy formability
- Versatile use (from frost protection to 400°C)
- Limiter required in hazardous areas
- Large selection of specific resistors
- Supplied already assembled

Technical Datas

- Rated voltage up to 500V (higher voltages available on request)
- Max. Operating temperature 400°C (higher temperatures possible on request)
- Min. ambient temperature -60°C
- Min. installation temperature -60°C
- Min. bending radius 6 x outer diameter
- 0.16....10 Ohm/m

Approvals

- With ATEX approval as standard
- Other approvals possible on request
